## Profile

Senior Full-Stack Software Engineer with 10+ years of experience building scalable web and mobile platforms. Specialized in SaaS architecture, CMS systems, and API-driven applications using Laravel, NestJS, Next.js, React, Flutter, and PostgreSQL. Experienced in designing multi-tenant systems, building secure APIs, and delivering production-ready platforms across government, enterprise, and startup environments. Also serves as a Flutter instructor at the Lebanese University, mentoring graduate students in modern mobile development practices.

## Employment

**Senior Software Engineer** Mar 2021 - Present  
EVERTEAM INTALIO, Antelias

- Led development of full-stack web and mobile platforms using Laravel, Strapi, Next.js, and Flutter, delivering scalable solutions across multiple sectors.
- Delivered major platforms including the Baskinta Citizen Portal, Sursock Museum Digital Platform, and MEA Crew Management Portal with multilingual support, real-time features, and modular architecture.
- Built and deployed cross-platform mobile applications for ISF and Regie integrated with external APIs and identity services.
- Designed custom CMS systems and API-first architectures, enabling scalable content management and efficient admin workflows.
- Collaborated with stakeholders and product teams to transform business requirements into production-ready systems, while supporting pre-sales demos and technical documentation.

**Senior Full-stack Developer** Jan 2019 - Mar 2021  
AxisMEA, Beirut

- Designed and maintained backend solutions with Laravel and MySQL for large-scale applications
- Collaborated on Angular and Vue.js projects to deliver responsive web applications
- Provided client support and consultation on new feature development

**Full-stack Developer** Jan 2015 - Jan 2019  
Infinitcodes, Beirut

- Delivered custom e-commerce platforms and CMS dashboards using Laravel and WordPress
- Handled server setup, hosting, and domain management
- Built responsive UIs with Bootstrap and integrated dynamic features using jQuery and Vue.js

**IT Consultant** Jan 2010 - Jan 2020  
Self-Employed, Beirut

- Supported SMEs with network/server setup, troubleshooting, and upgrades
- Specialized in Windows Server, Active Directory, DNS, Group Policy, and on-prem IT infrastructure

- Mentoring

## Education

### Bachelor of Science in Computer Science

Sep 2011 - Jul 2014

American University of Culture & Education, Lebanon

## Languages

English ●●●●●

Arabic ●●●●●

## Teaching Experience

### Flutter Instructor

2024 - 2026

Lebanese University - Faculty of Sciences

- Designed and delivered the Flutter mobile development course for Master 2 (M2) students
- Covered topics such as custom widgets, theming, API integration, state management, and full project structure
- Guided students through project planning and implementation phases
- Promoted industry-level standards and hands-on practices

## Selected Projects

### Client-Service Billing Platform

In-Progress - Laravel, Inertia.js (React), and PostgreSQL

Developing a modular billing and invoicing platform for service providers with automated billing, subscription management, versioned pricing, and financial audit tracking, built with a scalable service-oriented backend and responsive UI.

### Vendora – e-commerce Platform

Laravel 12 + Inertia.js (React) + Tailwind CSS and PostgreSQL

Built and scaled a production e-commerce platform with a full admin CMS and storefront, supporting multilingual/RTL content, dynamic homepage management, product and order management, cart and checkout workflows, role-based admin access, and integrated notifications.

### Spendary – Mobile App

Flutter (Android – iOS), SQLite

Built Spendary, an offline-first Flutter finance management app supporting multilingual usage (EN/AR/FR), SQLite local storage, and Riverpod state management. Implemented features including wallets, transactions, budgets, recurring payments, and dashboards, with secure biometric authentication and optimized performance for large datasets.

### OxFam Project Management Platform

#### Backend

Nest.js, PostgreSQL, DDD Pattern

Designed and implemented a NestJS/Prisma backend using Domain-Driven Design (DDD) for project funding workflows, including modules for projects, payments, expenditures, and outcomes with role-based authorization, file uploads, and automated notifications.

### Baskinta Municipality Citizen Portal

Next.js 15, TypeScript, Tailwind CSS, React Query

Built the Baskinta Municipality citizen portal frontend with secure OAuth authentication, enabling residents to access services, submit requests, and track applications.

### Bakery ERP System

Next.js, Nest.js (API Routes), PostgreSQL, React Query, Tailwind CSS

Developing a multi-tenant SaaS ERP platform for bakery operations. Includes inventory, recipe-based production, POS, loss tracking, and role-based dashboards for admins, owners, and POS users.

### **MEA Crew Management Portal**

[Next.js 15](#), [Strapi v5](#), [TypeScript](#), [React Query](#), [PostgreSQL](#)

Built a modular crew platform with secure login, WebSocket-based chat, multi-language support, and real-time dashboard metrics. Architected using clean separation of concerns and reusable API layers.

### **Sursock Fundraising & Donor Platform**

[Strapi v5](#), [Next.js v15](#), [PostgreSQL](#), [Tailwind CSS](#), [TypeScript](#)

Designed a fundraising CRM with donation tracking, event coordination, automated follow-ups, and dynamic reporting. Supports SSR, secure role-based access, and React Query for data management.

### **Multi-Tenant Digital Menu**

[Laravel 11](#), [React.js](#), [Inertia.js](#), [Tailwind CSS](#)

Enabled restaurants to manage multilingual menus, generate QR codes, and display live menus with a fast, intuitive UI. Real-time feedback with Swal and toast notifications.

### **ISF Mobile App**

Built a Flutter mobile application integrated with Laravel APIs and Oracle systems, allowing users to access identity services, submit document requests, and track application statuses.

### **Regie Mobile App**

Built a Flutter mobile app integrated with Laravel APIs and identity services, providing employees secure access to internal systems and real-time data.

### **Presales Opportunities & Tasks Portal**

[Laravel](#), [MySQL](#), [Angular](#)

Developed a sales opportunity management platform using Laravel APIs, MySQL, and Angular, enabling sales teams to manage opportunities, assign tasks, track lifecycle stages, and analyze performance through dashboards and reporting.

### **Lebanon Football Guide**

[Laravel Blade](#), [jQuery](#)

Built a sports CMS platform with Laravel and jQuery to manage articles, league matches, and automatically generate team rankings and player statistics.

### **Car Rental Management System**

[Laravel API](#), [Angular](#)

Built a car rental management platform with Laravel and Angular supporting vehicle tracking, rental scheduling, maintenance management, and profitability dashboards.

### **Employee Management System**

[Laravel Blade](#), [Vue.js](#)

Developed using Laravel Blade and Vue.js, this system enables companies to create employee files, manage work and skills, track vacations, and more.

### **Internal Email Management System**

[Laravel Blade](#)

Developed an internal email management system using Laravel Blade, enabling organizations to manage inbox/outbox communications with role-based permissions, message routing, and dashboard reporting.

### **Travel Services Management System**

Created using Laravel Blade and Vue.js, this system allows companies to create client files, schedule travel, maintain travel history, and print travel tickets and cards with travel data.
